Total potential annual savings: \$1465.80

## Savings Plan Recommendations

Plan Type	Hourly Commitment	Term	Payment Option	Monthly Savings (\$)	Utilization
Compute Savings Plan	\$0.68/hr	1 year	Partial Upfront	\$122.15	90.0%

Total estimated monthly savings from Savings Plans: \$122.15

## Guidance

These recommendations are based on historical usage patterns. Before purchasing Reserved Instances or Savings Plans:

1. Verify that the recommended instances match your workload requirements.
2. Consider your future capacity needs and growth plans.
3. For Reserved Instances, decide between Standard or Convertible RIs based on your flexibility needs.
4. For Savings Plans, Compute Savings Plans offer more flexibility than EC2 Instance Savings Plans.
5. Consider a mix of 1-year and 3-year commitments to balance savings and flexibility.
